

Network Evidence of Async Functions:

Fetch() Methods

The image displays two screenshots of a web application named "Service Sphere" with the DevTools Network tab open, illustrating the use of the Fetch() method.

Top Screenshot: The application interface shows filters (Price, Service Type, Gender) and a list of services. The Network tab shows a request to `search/term=` with a status of 304, type of fetch, and a response time of 20 ms. The response size is 0.2 kB.

Bottom Screenshot: The application interface is the same. The Network tab shows the response payload for the `search/term=` request. The response is a JSON array of two helper objects:

```
1 {
  "helpers": [
    {
      "id": "681998d4f423b21c46a6fc59",
      "name": "Jahnvi Patnam",
      "availability": "only on weekdays",
      "gender": "female",
      "rating": "4.5",
      "service": "Painting",
      "price": 120
    },
    {
      "id": "681998d4f423b21c46a6fc59",
      "name": "Jahnvi Patnam",
      "availability": "only on weekdays",
      "gender": "female",
      "rating": "4.5",
      "service": "Cooking",
      "price": 250
    }
  ]
}
```
