

Admin Table :

This model defines the structure for storing **Administrator** user details, including their name, unique email, and password, within a MongoDB collection.

Admin Attributes

- `_id` (Primary Key)
- `name`
- `email` (Unique Key)
- `password`

Bookings Table

This model records a service transaction, linking a specific **Helper** and **Seeker** to a **service type**, **date**, **time**, **address**, **status**, **price**, and **payment** status.

- `_id` (Primary Key)
- `helper` (Foreign Key to 'Helper')
- `seeker` (Foreign Key to 'Seeker')
- `service_type`
- `date`
- `time`
- `address`
- `status`
- `price`
- `paid`

Contact Message Table

This model stores messages submitted through a contact form, including the sender's details, the type of issue, the message content, and a reference to an administrator.

- `_id` (Primary Key)
- `name`
- `email`

- adminId
- phone
- issueType
- message
- submittedAt

Feedback Table

This model records a user's feedback, including a rating and textual comment, given by a **Seeker** about a **Helper** for a service they received.

- `_id` (**Primary Key**)
- `seeker` (**Foreign Key** to 'Seeker')
- `helper` (**Foreign Key** to 'Helper')
- `feedback`
- `rating`
- `date`

Helper Table

This model stores the profile, authentication, and service details for a service provider, including their name, unique contact information, offered services, and approval status.

- `_id` (**Primary Key**)
- `name`
- `email` (**Unique Key**)
- `password`
- `mobilenumber`
- `aadharnumber`
- `gender`
- `services`
- `availability`
- `certifications`
- `approved`

Seeker Table

This model stores the essential profile and authentication details for a user seeking services, including their name, unique email, password, mobile number, and address.

- `_id` (Primary Key)
- `name`
- `email` (Unique Key)
- `password`
- `mobilenumber`
- `address`

Service Table

This model defines a general service type offered by the helpers, identified only by its unique name.

- `_id` (Primary Key)
- `name` (Unique Key)

ServiceRequest Table

This model captures a service request made by a **Seeker** to a specific **Helper**, detailing the customer information, requested service, scheduled time, location, and current status.

- `helper` (Foreign Key to 'Helper')
- `seeker` (Foreign Key to 'Seeker')
- `customer_name`
- `service_type`
- `date`
- `time`
- `address`
- `status`
